NEW RESIDENTIAL CONSTRUCTION IN NOVEMBER 2010

The U.S. Census Bureau and the Department of Housing and Urban Development jointly announced the following new residential construction statistics for November 2010:

BUILDING PERMITS

Privately-owned housing units authorized by building permits in November were at a seasonally adjusted annual rate of 530,000. This is 4.0 percent ($\pm 2.9\%$) below the revised October rate of 552,000 and is 14.7 percent ($\pm 1.7\%$) below the November 2009 estimate of 621,000.

Single-family authorizations in November were at a rate of 416,000; this is 3.0 percent ($\pm 1.0\%$) above the revised October figure of 404,000. Authorizations of units in buildings with five units or more were at a rate of 94,000 in November.

HOUSING STARTS

Privately-owned housing starts in November were at a seasonally adjusted annual rate of 555,000. This is 3.9 percent ($\pm 12.0\%$)* above the revised October estimate of 534,000, but is 5.8 percent ($\pm 12.0\%$)* below the November 2009 rate of 589,000.

Single-family housing starts in November were at a rate of 465,000; this is 6.9 percent ($\pm 13.5\%$)* above the revised October figure of 435,000. The November rate for units in buildings with five units or more was 72,000.

HOUSING COMPLETIONS

Privately-owned housing completions in November were at a seasonally adjusted annual rate of 513,000. This is 14.1 percent ($\pm 10.9\%$) below the revised October estimate of 597,000 and is 39.6 percent ($\pm 8.6\%$) below the November 2009 rate of 850,000.

Single-family housing completions in November were at a rate of 436,000; this is 10.1 percent $(\pm 11.6\%)^*$ below the revised October rate of 485,000. The November rate for units in buildings with five units or more was 73,000.

New Residential Construction data for December 2010 will be released on Wednesday, January 19, 2011, at 8:30 A.M. EST.

EXPLANATORY NOTES

In interpreting changes in the statistics in this release, note that month-to-month changes in seasonally adjusted statistics often show movements which may be irregular. It may take 3 months to establish an underlying trend for building permit authorizations, 3 months for total starts, and 5 months for total completions. The statistics in this release are estimated from sample surveys and are subject to sampling variability as well as nonsampling error including bias and variance from response, nonreporting, and undercoverage. Estimated relative standard errors of the most recent data are shown in the tables. Whenever a statement such as "2.5 percent (±3.2%) above" appears in the text, this indicates the range (-0.7 to +5.7 percent) in which the actual percent change is likely to have occurred. All ranges given for percent changes are 90-percent confidence intervals and account only for sampling variability. If a range does not contain zero, the change is statistically significant. If it does contain zero, the change is not statistically significant; that is, it is uncertain whether there was an increase or decrease. The same policies apply to the confidence intervals for percent changes shown in the tables. On average, the preliminary seasonally adjusted estimates of total building permits, housing starts and housing completions are revised about two percent or less. Explanations of confidence intervals and sampling variability can be found on our web site listed above.

^{* 90%} confidence interval includes zero. The Census Bureau does not have sufficient statistical evidence to conclude that the actual change is different from zero.
